

Arctic Star Exploration is a Canadian Exploration Company based out of Vancouver, Canada focused on exploring for Diamonds in the Northwest Territories and Nunavut as well as rare earth elements in Northern B.C.

100% Canadian Properties

Diagras Property, Lac de Gras, Northwest Territories, J.V with Margaret Lake 40/60
 Stein Property, 100% owned, Nunavut, Boothia Peninsula
 Athabasca Diamond project, 100% owned, Northern Saskatchewan
 Cap Property, 100% owned, Northern, B.C. Project

Diagras Property Lac de Gras

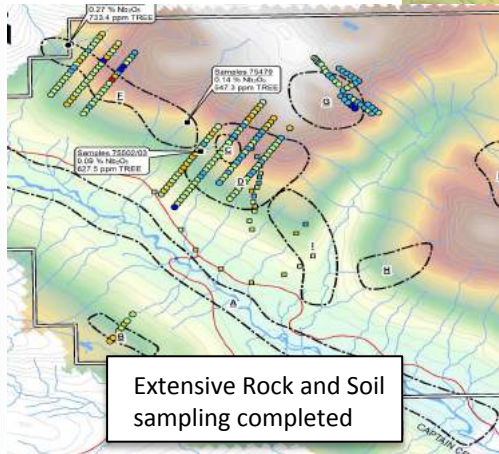

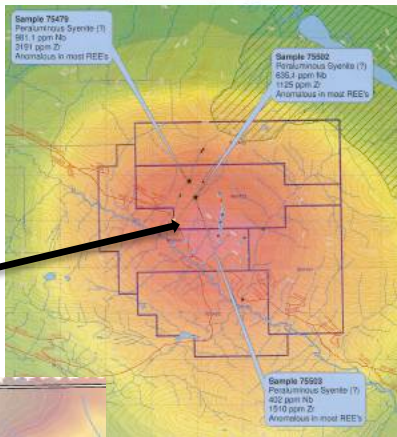

31 kms away from Ekati Diamond Mine located on the Slave craton in the Northwest Territories. 13 kimberlites were discovered on property in the 1990's by De Beers, **all magnetic high** targets. Kennady Diamonds has recently made major discoveries revisiting neighboring properties and drilling **non magnetic high** targets, we hope to continue this success on our Diagras property! Arctic Star and Margaret Lake 40/60 Joint Venture, currently planning winter/spring 2017 program

TSX-v- ADD
Frankfurt 82A1. A2DFY5

CAP PROPERTY

Niobium and Rare Earths.
Northern B.C. geophysics
and rock and soil sampling
have discovered significant
drill ready targets.

Similar neighboring anomalies have turned out to be large carbonatites that host Niobium and Rare Earth Elements. (RRE)

DRILLING SPRING 2017
