Arctic's Projects

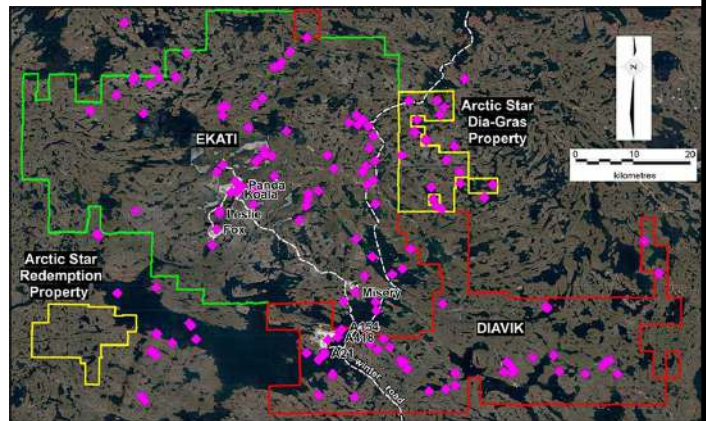

Diagras Diamond Property, N.W.T

Diavik Diamond Mine

Buddy Doyle, Arctic Stars' VP of Exploration lead the team that discovered the Diavik Diamond Mine.

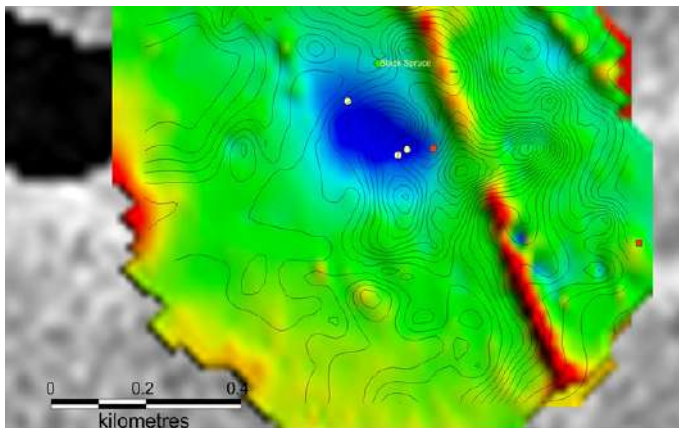

Diagras Claims & Kimberlites

Diavik has produced over 100 million carats of diamonds since 2003 and is currently operated by Rio Tinto who sold 40% to the Washington Group for \$1.2 Billion.

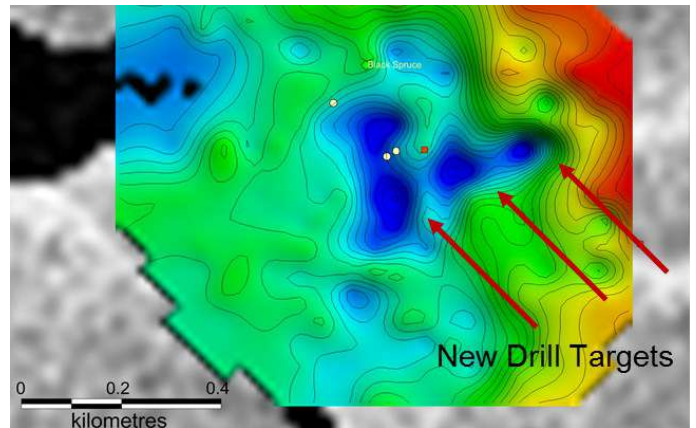

Black Spruce Kimberlite

Magnetic Survey 2017

DeBeers and Majescor previously drilled magnetic anomalies. Magnetic surveys were commonly used technology at the time when Diavik was discovered.

Gravity Survey 2017

Gravity technology shows rock that is less dense such as kimberlites than the surrounding country rock such as granite.
